**Tools:** Gitlab, Github, AWS, Zapier, Slack, Firebase, Intercom, Salesforce, Hubspot

## Career Experience

**Bettermode, Inc., Toronto** **3/2019 – 9/2023**  
Full Stack Engineer

Led the development of highly scalable backend and frontend architecture. Maintained responsibility for hiring and managing interns through day-to-day activities, including thorough code reviews.

- Jumpstarted the development of robust SaaS solutions for brands such as Tim Horton's, ASUS, IBM, PipeDrive, Decathlon, and Leboncoin.
- Facilitated seamless integrations with software platforms such as Salesforce, Hubspot, Zapier, Slack, Firebase, Intercom, and others.

**Freelancer, Tehran** **9/2015 – 3/2019**

Served in an independent role in the creation and ongoing maintenance of a dedicated instant messaging platform while overseeing the construction of a dynamic business intelligence dashboard.

- Fused React and Node while connecting them with MongoDB to produce data-driven insights as needed.
- Developed an online mail tracking system via Django, ultimately streamlining the entire communication process.

**Vada Future Communications, Tehran** **12/2014 – 9/2015**  
Android Developer

Recruited into an established web and mobile development team of six members, which was ultimately acquired by Vada Future Communications.

- Attracted 10,000+ daily users through the design of a user-friendly and intuitive navigation / mapping system.
- Spearheaded research to improve the overall performance of the dedicated platform.
- Developed critical infrastructure to serve as the backbone for future projects.
